Enunciado:

The hotel offers a set of activities, identified by an integer.

Activities are performed on different days of the week.

Two activities performed at the same time are incompatible.

Activities can belong to three different categories:

A list of alternatives alternatives must be chosen.

Only the alternative activities must be chosen.

Every date can only belong to one season.

ntified by a code, which have a description
days and hours, but one activity performed on a
time are not offered, i.e., in one hour of one day
t kinds: only for children, only for adults, for eve
: be available available in such a way that an act
e known, the order is not relevant
ason that must be known

a specific day is only performed once (in one hour), only one activity can be performed by anyone
activity can be replaced with other of the same kind
